

New Products

DURR Compressors

High Precision, Teflon coated pistons produce maximum power without oil lubrication. The intake filter and fine filter of the air dryer ensure hygienic purity. Air drawn is heated by compression before being cooled in the cooling coil and moisture automatically ducts away.

DURR SUCTION SYSTEM

This system has an automatic separator that separates the solid & liquid components from the aspirated air right at the chair.

VS 300 S/600/900 models combine a suction machine and separation in a single unit which in case of the VS300 S can easily be installed right next to the Dentist's chair.

In office bleaching system: DISCUS DENTAL

It is said to produce an average of 8 shades in just one hour. The system consists of using whitening gel on the teeth which is activated by a small highly specialised lamp for one hour.

All Ceramic System VITA

It is suitable for preparing metal free anterior and posterior crown substructures due to its relatively low investment cost allows fabrication of all-ceramic crown substructures made of VITA In-Ceram ALUMINA and ZIRCONIA. Processing can be done in a conventional ceramic furnace with a holding time of only 40 minutes.

RCT Hand Piece Sirona Dental

For air and electric motors this handpiece is equipped with five torque settings that can be adjusted directly via the pre-selection ring on the handpiece, allowing use of the handpiece with commonly available nickel-titanium file systems.

In combination with an air motor, the SIRONiTi Air reaches optimum speed for endodontic treatment. If the handpiece is attached to an electric motor, file systems can be deployed with a higher maximum speed limit. The maximum file speed is 600rpm at a motor speed of 40,000rpm.

SOLO 7000 (MICRO PROCESS PROGRAMMABLE CHAIR)-Suzynova

Solo-7000 Chairs are powered by two extremely quiet motors (Denmark or Germany make) with a sufficient lifting capacity. Multi Erasable (Denmark / Germany Make) programme to pre-positioned working position. Pre-programmed automatic position can be easily reset to an infinite number of positions.

Chair Mount Dental Unit - The design of the operating Dental Unit has been created for a functional dental surgery as well as for advanced, industrial production. Its smooth, rounded surfaces are easy to clean so that they guarantee a perfect disinfection throughout the dental surgery. Unit of the Complete body -

made from fiber glass scratch proof and chemical resistant. Unit consists of Spittoon and Tumbler with automatic water system.

8DSR Intraoral camera system-Rolence

Wireless Intraoral Camera (with autofocus Docking Station with Built-in Receiver)

* Economic, Light weight, Wireless Portability, Long Life Battery, Multi Channel Selector. Super Bright Lightening, Extra Strong Signal Transmitter 2.4GHz

Features:
* 1/4 inch color CCD tech. (760,000 pixels)
* 1/4 images (quad) may be displayed on monitor
* Zoom, freeze and delete function can be operated
* 4 channel options for multiple users
* Docking station can be connected to PC or Video Printer

* 6 continuous hours of imaging on fully charged battery

Bonding System: Shofu

It is used for repair of fractured ceramic or indirect composite restorations intra-orally, even when metal is exposed. It can also be used in the laboratory for fabrication and repair of prostheses providing excellent bond to metal, ceramic, and resin materials.

When used with CeraResin Bond, a 2-step light cure bonding material, a secure bond is achieved.

New Porcelain Shades- Ceramco

CERAMCO 3 Porcelain System has added 19 new C3 shades making a complete 26 shade kit available. These nineteen C3 shades complete the series of 3 D comparable shades.

DENTSPLY Prosthetics CERAMCO Group, U.S.A.

Surgery System Cefla, Italy

It uses innovative and original solutions in materials and technology to provide for patient comfort. The system is compatible with multimedia systems and the technology allows integration into the dental unit of BIOSTER, an automatic systems to run cycles disinfecting water lines.

Appliance Case-Glenroe Technologies, U.S.A.

Fits easily in a pocket or purse and is specifically designed for smaller appliances, like whitening trays and invisalign retainers. Molded of medical grade plastic, it contains a strong hinge that will not tear and break with age or heavy use.
